

## CALL FOR PAPERS

The **embedded world Exhibition & Conference** is the premier event worldwide on the topic and continued this path recently using hybrid and online formats. It brings together researchers and developers, industry and academia from all disciplines of embedded system development.

Now in its 20<sup>th</sup> edition, the **embedded world Exhibition & Conference 2022** (<https://www.embedded-world.eu>) will be staged from 15 to 17 March 2022 in Nuremberg. The embedded world Conference in collaboration with the Open Source Automation Development Lab (OSADL) eG is calling for proposals for a special **OSADL** session.

The unique selling proposition of this partnership is in bringing OSADL, a competence network providing services to use Open Source Software in industrial products, together with the broad variety of solutions, architectures, and requirements of embedded and IoT development.

The special topics of the OSADL session shall include:

- legal aspects of open-source software
- organizational and process-related aspects around the industrial use of open-source software
- technical aspects of open-source software

Please submit your proposal at [www.embedded-world.eu/call-for-papers](http://www.embedded-world.eu/call-for-papers) until **29th Sep 2021**, selecting the topic “**11.6: OSADL – Open Source Software**”.

Authors will be notified by 22<sup>nd</sup> Nov 2021. Presentations shall be submitted until 18<sup>th</sup> Feb 2022. Optionally, papers can be submitted for publication in the conference proceedings, which will be made available soon after the event.
